

Feb 28 Meeting Notes:

- OPENAI DEEP RESEARCH
- What research can we find that is in the intersecting areas of these three broad concepts: **medication compliance/adherence, vulnerable populations, Interventional Methods/techniques/tools/services**
 - **Try using gemini**
- ~~Schedule Meeting with Paris~~
- Specificity:
 - Try making each of the three pillars more specific, for example:
 - **Making “vulnerable pop” more specific**
 - Medication compliance for **older adults**/cognitively challenged[other vulnerable pop] & interventional methods
 - **Make interventional methods more specific:** such as using digital tools
 - **Example: MyTherapy:**
<https://apps.apple.com/us/app/mytherapy-medication-reminder/id662170995>
- Goal of this review paper: Deep lit review to give us a solid foundation for introducing Lookupmed as a potential
- Look at research for the last decade and check the volume of literature
- Establish a list of journals we might be able to publish this review paper
 - How to look for journals?
 - Use the keywords to look for journals that focus on the three main topics (healthcare, medicine intervention, vulnerable population (elderly))
 - Gerontology journals
 - Healthcare & Gerontology journal
 - Where to search for journals?
 - <https://onesearch.library.utoronto.ca/faq/how-do-i-find-journal-title-librarysearch>
